

PTC PLM Cloud

PRODUCT DEVELOPMENT ON THE CLOUD

SaaS Product Lifecycle Management (PLM) for small and mid-sized companies

The growth of cloud-based computing is accelerating. With greater acceptance of cloud based IT approaches, companies are adopting cloud strategies to capitalize on cost savings and flexibility. The PTC PLM Cloud alleviates the daily challenge that product teams face in keeping track of their data without the overhead typically required to maintain such a system. Designers can now be confident that their work will not be overwritten by others and that everyone is using the latest released versions of product designs. And it accelerates the work of non-CAD users by providing easy access to just the information they need.

The PTC PLM Cloud helps manufacturers build more competitive products by helping organizations:

- **Deliver** projects on-time with proven product development capabilities.
- **Minimize** IT complexity and cost with a certified and secure cloud infrastructure
- **Accelerate** time to value with an instantly deployable product
- **Reduce** product issues with an online, automated change process

Key Features

PTC PLM Cloud is available in three different packages – Standard, Premium and Enterprise. All three packages offer the following:

Comprehensive Product Development Capabilities

- Integrated, multi-discipline BOM
- Top-down design
- Automated business processes
- Add more capabilities as your business needs grow

Distributed collaboration

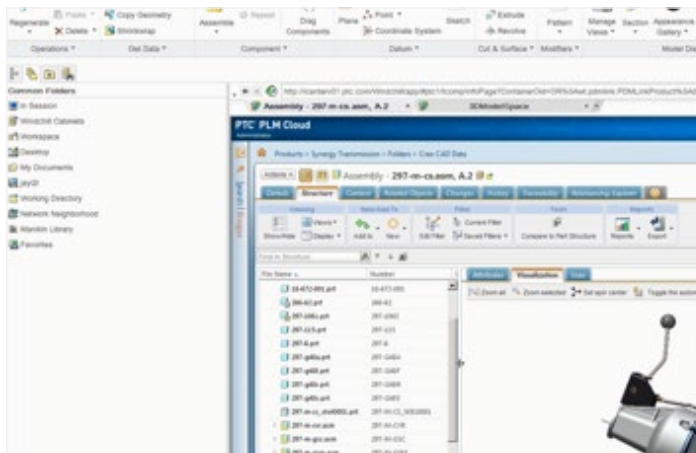

- Central, secure repository for shared content
- Access control for projects and folders

Change and Configuration Management

- Standardized, automated change process
- Share product configurations with extended teams and partners

Project Management

- Scheduling and sequencing of activities, tasks and milestones with assigned resources
- Project status reporting

PTC PLM Cloud can be accessed from within the PTC Creo browser

Rapid Deployment

- Software online within 24 hours
- PTC Cloud Services expertise for sizing

Secure Hosting and IT Administration

- SSAE-16 certified data centers
- Expert IT administrators to monitor and maintain peak performance

Scalable

- Support users in one location or across distributed teams
- Dynamically scale solution and infrastructure based on business needs

Expert Application Management

- Experienced specialists for integration, monitoring, tuning and software upgrades
- Application SLAs based on 99.5% availability

BENEFITS

Reduce product costs

On-time projects

Improved collaboration

Accelerate time to value

Reduce Rework and Scrap

PTC® PLM Cloud

INFRASTRUCTURE

Datacenter Allocations

- Engineers
- Security
- Manangement

Datacenter(s)

- Network
- Power
- HVAC
- Physical Security
- Floor/Rack space

SOFTWARE

PTC Windchill

Middleware

Oracle Database

Operating System

Support

Software Updates

LEGEND

■ PTC Partner

□ PTC

■ Hosting Service Provider

“Our main objective when deciding for PTC Windchill on the Cloud was to have a central repository of up-to-date product information and efficient delivery of that data to customers and technical support staff, but at the same time to minimize the burden on IT while maintaining a predictable monthly cost. With PTC, we have met our goals.”

– Vinny Guercio, VP Engineering, RAB Lighting

“PTC’s offering has been designed to allow smaller companies, which have previously been unable to rapidly implement PLM capabilities, to quickly deploy and adopt key data management, visualization and reuse functionality.”

– Peter Bilello, President, CIMdata

Choose the package that's right for you

	PTC PLM Cloud Standard	PTC PLM Cloud Premium	PTC PLM Cloud Enterprise
	A shared, pre-configured PTC Windchill instance that enables immediate go-live	A dedicated PTC Windchill instance that supports customer-specific system configuration	A dedicated PTC Windchill instance that supports customer-specific system configuration and integrations to corporate systems
CAPABILITIES			
MCAD data management	•	•	•
Document management	•	•	•
